

WORLD TOUR

WORLD TOUR is bringing something around from place to place. It is a belief that there is something which can be or should be delivered to all people. Even it has to be adapted to specific conditions of encounters, everybody is different, it is the believe in something universal, uniting.

The situation which is experienced operates in a associative modus suggesting topics like cooperation, vision and the encounter of the other. Shifting constantly from the view on the singular individual to the universal mass.

Hoping therefore to initiate an affect for the creation of a better future, through an experience neither restricted to time nor space.
